

The image shows the cover of a BioBizz product brochure. The background is a photograph of a greenhouse interior with several black plastic pots containing young green plants. The plants are growing in a layer of grey gravel. A white rectangular box is centered over the image, containing the text 'BIOBIZZ' in a large, bold, white sans-serif font. Below it, 'PRODUCT BROCHURE' is written in a smaller, bold, white sans-serif font, and '2016' is written in an even smaller, bold, white sans-serif font. The 'O' in 'BIOBIZZ' has a small white circle inside it. A registered trademark symbol (®) is located to the upper right of the 'Z' in 'BIOBIZZ'.

INTRO

Product innovation and quality control lies at the heart of our success. Ecologically aware and socially responsible, our scientists and technicians use the very latest technology available to research, develop and manufacture all Biobizz products. And all our new and existing products are subjected to regular, thorough inspections.

We have more than 12,000m² of modern facilities at our disposal, equipped with sophisticated technological components. And as each phase of the production process has been 100% developed by computer programmes, all our products offer a perfect, uniform blend of ingredients.

It's this complete commitment to quality and the environment that has created a loyal customer base across Europe and beyond to include North and South America, Africa, and the Middle East.

ABOUT BIOBIZZ®

ABOUT BIOBIZZ®

From planting seed to picking the first produce, Biobizz® is leader when it comes to eco-friendly crop cultivation. Potting soil, liquid fertilizers, substrate enhancers – we produce a huge range of 100% biological products for all kinds of plants. In fact, ever since we began in 1992, Biobizz has helped people grow successfully and organically, with no earth-hating chemicals in sight.

GREEN THINKING

Our philosophy is pure and simple: to be ecologically aware and make the organic cultivation of crops accessible for everyone, without leaving behind any negative impact on the environment.

EARTH MISSION

Before our top quality organic fertilizers are sold, you can be sure the highest level of research and development has gone into them. It's why we can claim that every Biobizz®-product consistently contains the correct amount of organic ingredients. And why we guarantee satisfaction and peace of mind. Because with us taking care of your crops, you know that you're helping protect the earth from harm.

Although Biobizz Worldwide was founded in the Netherlands, today our main facilities are in Spain. We also have sites in France, England, North America and another one in Spain. Being able to deliver to partners all over world means everyone has the opportunity to grow well with Biobizz.

CERTIFICATIONS

OMRI

The Organic Materials Review Institute (OMRI) is an international non-profit organisation that determines which contributions are permitted for use in organic production and processing. OMRI's staff is managed by a Council of Directors, which is widely representative of the organic industry: assessors, farmers, suppliers, processors, traders, consumers' organisations, and animal and environmental protection groups. Products from the OMRI list are suitable for use in foodstuff processing and organic production.

GOOD QUALITY SOIL MARK

The Good Soil Quality Mark is an independent inspection mark for potting soil, soil improvers and fertilizers that guarantees product quality and ensures safe, contamination-free products.

To make the grade, products must conform to strict requirements that apply to all raw ingredients, the production process and the final product. All requirements are monitored by the inspection mark and regularly tested and assured by Control Union Certifications.

CONTROL UNION

Control Union is an international organisation for organic production inspection and certification throughout the world at a global level. It's in accordance with standard ECC Regulation No. 271/2010.

This organisation guarantees that certified products do not contain any chemical fertilizer or pesticide, chemical or synthetic flavours, colours or preservatives, or genetically modified organisms (GMO).

POINT VERT

The Point Vert symbol is used on packaging to show that the producer contributes to reducing the environmental impact of product packaging. Also known as the Green Dot, the Point Vert was founded in Germany in the early 90s to help educate people about environmental pollution caused by waste and to create a programme to help the environment recover. The programme is financed by companies contributing when they register to use the Green Dot or Point Vert.

Biobizz not only produces organic fertilizers, we also care deeply about contributing to a better environment in any way we can. So naturally we're registered under the Point Vert certificate and you'll see the little green logo on all our product packaging.

CERTIFICATIONS

CONTROL UNION CERTIFICATIONS, NATIONAL ORGANIC PROGRAM (NOP) INPUT

Agricultural products that are sold, labelled or represented as allowed for use on organic operations must be produced and processed in accordance with the Control Union Certifications Standards based on the National Organic Program (NOP) of the US Department of Agriculture. Control Union Certifications (CU) has inspected Biobizz products and found them to be in accordance with these standards.

Control Union has certified Biobizz products as an input allowed for use on organic operations. Products labelled as '100 percent organic' may only contain organically produced ingredients and processing aids, excluding water and salt. Agricultural products labelled '100 percent organic' cannot be produced using excluded methods, sewage sludge or ionizing radiation.

cleangreencert.com

CLEAN GREEN CERTIFIED

Clean Green Certified is a third-party certification program modeled on existing national and international agricultural standards, ensuring environmentally clean and sustainable methods. It incorporates aspects of the USDA's National Organic Program (NOP) international organic programs and sustainable farming practices.

It was established in California in 2004, and has since expanded to 7 other states.

Products licensed to carry the Clean Green Certified logo contribute to the sustainability of farming. The certification is based on processing and handling standards, which certify Biobizz' ability to keep organically, sustainably-grown product separate from product grown with synthetic pesticides. The Clean Green program allows Biobizz to be distinguished from the rest, with a label that stands for legal compliance, consumer quality and environmental stewardship.

SUBSTRATES

LIGHT-MIX®

WHAT IS LIGHT-MIX®?

If you want more control, Light-Mix® provides the ideal foundation for encouraging vigorous growth in seedlings, young plants and cuttings – right from the beginning.

It gets the vital micro activity going as the water works with the soil, producing organic catalysts that rapidly develop root structures. Light-Mix® has also been specially blended to ensure optimal drainage throughout – an essential property if you use automatic irrigation systems.

HOW TO USE IT

You can apply larger quantities of this fertilizer to any kind of plant, including heavy feeders, without the risk of overloading the soil and causing a nutrient burn – indicated by yellowing and crunchy, burnt tips on the leaves. With automatic watering it's important that the water properly infiltrates the substrate, or this can become too wet and cause mould to form.

THE PH AND EC VALUES

Biobizz products only contain natural organic elements rather than mineral salts such as magnesium or sulfates that you might find in synthetic fertilizers. This gives Light-Mix® a medium Electrical Conductivity (EC) value. And while its organic elements are impossible to measure, they do have a self-regulating system, which helps maintain the pH values at the correct level.

ALL-MIX®

WHAT IS ALL-MIX®?

All-Mix® literally does it all for you – creating the optimum environment for plants to flourish throughout the year. This heavily pre-fertilized substrate mixture emulates a rich outdoor soil with a full micro active ecosystem. And it's been designed to have enough nutrient-fuelled power to sustain lush growth for a couple weeks, without any need to add any extra fertilizer.

HOW TO USE IT

When using All-Mix® for the first time, moisten it with water and leave to stand for 36 hours. This gives the Pre-Mix™ active fertilizer and microorganisms inside the substrate a chance to start working their magic before the plants goes in.

Keep the soil slightly warm at all times – if it's too cool, the microbial activity slows down, which makes it more difficult for the plants to grow. You also want to allow the soil to dry out between each watering. Because, as the All-Mix® substrate dries out, fresh air gets in, which helps the soil to breathe.

THE PH AND EC VALUES

Biobizz products only contain natural organic elements rather than mineral salts such as magnesium or sulfates that you might find in synthetic fertilizers. This gives All-Mix® a high Electrical Conductivity (EC) value. And while its organic elements are impossible to measure, they do have a self-regulating system, which helps maintain the pH values at the correct level.

COCO-MIX™

WHAT IS COCO-MIX™?

No, we're not talking chocolate bars here – but Biobizz Coco-Mix™ that is probably the best, 100% organic coco coir product on the market. It's made from waste materials left over by the coconut industry, which has proven to be an ideal medium for growing plants. To become this famous substrate, the coco coir matter is first decomposed over a period of time to soften the strong fibres. This is then washed in clear water, dried and shredded to become light and airy Coco-Mix™ – which contains little moisture and a low pH of 5 or 6.

HOW TO USE IT

Coco-Mix™ works well plugged into pots as a rock wool replacement for growing all kinds of hydroponic crops – simply fill small pots with plugs of Coco-Mix™. It's compatible with all types of nutrients and can be used to refresh All-Mix™ or other soil mixtures and with your usual A+B range to improve aeration. Combine it with Biobizz® products such Root-Juice™, Bio-Bloom™, Top-Max™ and Bio-Heaven™ and look forward to boosting the quality and yield of your plants.

ORGANIC SUBSTRATE ENHANCER

WORM-HUMUS™

WHAT IS WORM-HUMUS™?

Worm-Humus™, also known as vermicast, is the final product of decomposed material excreted by the king of the soil – the earthworm. This high quality organic compost is made from 100% pure, organic worm castings that have been stringently lab-tested to ensure they don't contain any farmyard waste, landfill waste or compost. Packed with water-soluble nutrients and bacteria, our Worm-Humus™ is a very nutritious organic all-round soil improver.

HOW TO USE IT

Worm-Humus™ is perfect for refreshing All-Mix®, adding to substrate mixtures already in use, or preparing the garden subsoil. The ideal proportions to aim for are a blend of: 10 - 15% Worm-Humus™ to 85 - 90% All-Mix®.

QUALITY YOU CAN TRUST

The earthworms that make our 100% organic humus are kept on a highly controlled and nutritious diet of rock minerals and organic potato peelings. Combine the worm castings they produce with the natural microbes in the ground, and you end up with the best quality worm humus you can buy.

ORGANIC DRY FERTILIZER

PRE-MIX™

WHAT IS PRE-MIX™?

Want guaranteed optimum growth, flowering, and maximum resistance to disease and fungal problems? Pre-Mix™ combines the qualities of different organic fertilizers, rock meals, trace elements, and fungi – all in just the right quantities in one convenient and versatile pack.

HOW TO USE IT

You can use Pre-Mix™ as a transplant or starter fertilizer. Blend it into any soil or soilless substrate, or combine it with high-quality organic worm castings to add microbial life and fortify the nutritional value of your soil or planting mix.

ORGANIC FERTILIZER

BIO-GROW®

WHAT IS BIO-GROW®?

You can apply this liquid growth fertilizer to most types of soil and substrate mixtures. It has 100% Dutch organic sugar beet extract at its base – commonly known as vinasse. This by-product of turning sugar beets or sugar cane into sugar is created by a natural fermentation process. Starches in the sugar are then treated with enzymes to produce glucose that, along with other plant nutrients, help produce a rich food source for soil microbes, boosting their populations for a more productive soil.

The natural sugars and potassium in Bio-Grow® activate the bacterial flora in the substrate to guarantee you an ample harvest of deliciously sweet fruit.

HOW TO USE IT

Bio-Grow® is a complete fertilizer that can be used throughout the growing period. Start with it as soon as the first leaves appear to when the plant is 10 - 15 cms tall. Then keep using Bio-Grow® until the end of the fruit production.

ORGANIC FERTILIZER

BIO-BLOOM™

WHAT IS BIO-BLOOM™?

Hoping for exuberant flowers that lead to tasty fruits? Then this complete liquid organic fertilizer, as its name suggests, is what you need. It contains the optimum blend of nitrogen, phosphorous and potassium, along with enzymes and amino acids – all working together in perfect harmony with the soil. Trace elements and hormones of vegetable origin have also been added to help create a strong-stemmed and vigorous flowering plant.

HOW TO USE IT

Bio-Bloom™ is an independently working fertilizer that can be used from the flowering period up to harvest. You can add it to soil, or to enrich a soilless medium such as Coco-Mix™ that's made from coconut fibres. Biobizz advises 1-4 ml Bio-Bloom™ per approximately 1 litre of water. But follow our feeding chart on the pack for the best results.

THE NUTRIENTS IN BIO-BLOOM™

Potassium and phosphorus help the buds, calyces and petals to form and grow. Potassium especially, works with the natural rhythm of the plant throughout the day and night which helps trigger the flowering process.

ORGANIC FERTILIZER

FISH•MIX™

WHAT IS FISH•MIX™?

This rich infusion of organic fish emulsion from the North Sea, mixed together with extract of Dutch sugar beet helps accelerate the growth of all living organisms in the substrate. It also stimulates the production of microorganisms and useful bacteria in all types of soil and coco-based substrates. And it's good to know that, in keeping with our strict organic farming requirements, Fish•Mix™ is not extracted with acids or stabilised with BHT (butylated hydroxytoluene) – a synthetic preservative.

HOW TO USE IT

You can use Fish•Mix™ on all outdoor plants during the first stages of growth, and during the flowering period until harvest. Even after a few days of use, it will have transformed poor quality earth into rich, fat soil – full of the natural minerals your plants are hungry for. It's also mild enough to be used in the first stages of a plant's life or sprayed directly onto leaves during the vegetative growing cycle.

If you want to combine Fish•Mix™ with your All•Mix® then our advice is to measure a 1 ml dose of Fish•Mix™ per litre of water. For Light•Mix®, increase the amount to a 2-4 ml dose per litre of water. Follow our feeding chart on the pack for the best results.

STIMULANT

ROOT-JUICE™

WHAT IS ROOT-JUICE™?

Made entirely from vegetable ingredients and designed for organic gardening, Root-Juice™ combines two amazing natural substances: premium humic acid and seaweed. It's specially formulated to encourage vigorous root development and enhance the natural biological life that surrounds and supports your plant's root system.

Right from the start, Root-Juice™ helps with the initial roots stage as well as the growth of plants that have already rooted. This ensures the plant is better prepared to absorb nutrients more quickly – resulting in a strong, resilient crop and a guaranteed good harvest for all plant breeders.

HOW TO USE IT

Root-Juice™ is ideal for adding to soil, peat and coco mixes, as well as providing guaranteed root protection with hydroponic or aeroponic systems. If you're using All-Mix® or Light-Mix® substrates, it's best to feed plants during the first week(s) with Root-Juice™ as this is the crucial time period for healthy rooting. Biobizz recommends a dose of 1 to 4 ml of Root-Juice™ per 1 litre of water.

TOP-MAX™

WHAT IS TOP-MAX™?

There are three excellent reasons to use this 100% organic flowering strengthener. First, it contains ingredients that can help increase the actual size and weight of the flower clusters. Second, nutrient uptake is improved. And third, plants grown with Top-Max result in sweeter, smooth tasting crops. How it activates the flow of nutrients is essentially down to how it's able to free up the minerals calcium, iron and magnesium in the soil, which stimulate the plant's metabolism.

HOW TO USE IT

Top-Max™ can be used during the complete flowering period and works especially well combined with Biobizz substrate mixtures. In the first weeks of growth, we advise a dose of 1 ml per litre of water. As harvest approaches and before flushing – when the nutrient solution is replaced with plain water to improve the taste and texture of the crop – the dose can be increased to 4 ml per litre of water. Follow our feeding chart for the best results.

THE BENEFITS OF HUMIC AND FULVIC ACIDS IN TOP-MAX™?

Top-Max™ is incredibly effective because of the humic acids it contains. The main source of these is an ancient substance in the soil called Leonardite. This comes from prehistoric trees and vegetation that flourished during the carboniferous period, 300 million years ago.

Fulvic acids also possess particular properties that contribute to healthy floral growth. These acids are taken from exceptionally rich sources of humate deposits found deep within the earth. Their natural electrical charge attracts nutrients and minerals present in both the microbiological soil base and applied organic fertilizers. Humic and fulvic acids work together to boost the energy in old plant cells while stimulating new ones to form.

ALG-A-MIC™

WHAT IS ALG-A-MIC™?

Stress-free, happy plants generally produce larger fruits. And Alg-A-Mic™ comes to the rescue if they've suffered from overfeeding, deficiencies, diseases or fluctuations in temperature. It also ensures green leaves, by stimulating chlorophyll absorption.

HOW TO USE IT

Alg-A-Mic™ is a revitalising product that contains a low level of NPK (Nitrogen, Phosphorus and Potassium) – making it impossible to overdose. It can be added to every substrate during the flowering and growing period. Our advice is to measure a 1-4 ml dose of Alg-A-Mic™ per 1 litre of water. But follow our grow schedule for the best results.

SEAWEED EXTRACTS IN ALG-A-MIC

As early as 3000 B.C., seaweed has been harvested for food, medicine and fertilizer. Alg-A-Mic is made from a high grade, organic seaweed concentrate extracted through cold pressing, rather than chemical solvents. This high level of natural nutrition caters to the whole spectrum of a plant's needs, resulting in plenty of verdant green foliage.

BOOSTER

BIO-HEAVEN™

WHAT IS BIO-HEAVEN?

Your plants will look forward to complete, all-round nirvana with Bio-Heaven™. It contains carefully selected biological stimulants, such as amino acids – the basic building blocks for proteins and enzymes that are essential for the plant's structure and metabolism.

As a result, this specially formulated energy booster not only improves the effects and translocation of nutrients in all foliar sprays and fertilizer blends – but it also gets rid of toxins through boosting the plant's anti-oxidant system and repairs chlorophyll production.

HOW TO USE IT

Bio-Heaven™ can be used during the entire growth and flowering period on every type of substrate, Coco-Mix™ and with hydrosystems. When using All-Mix® or Light-Mix®, the ideal dose is starting with 2 ml and slowly increasing to 5 ml per 1 litre of water. Follow our grow schedule for the best results.

THE BIO-HEAVEN BENEFITS

Bio-Heaven™ stimulates enzymatic activity and fast nutrient absorption, while increasing the chelate of essential macro and micronutrients. Plants are also better able to retain moisture and experience less humidity stress as a result. Bio-Heaven™ also provides an outstanding source of carbonic acid for microorganisms in the soil. Ultimately, the crop performs better and you can look forward to a higher quality yield.

STRENGTHNER

LEAF-COAT™

WHAT IS LEAF-COAT™?

Leaf-Coat™ is a ready-to-use product that strengthens and protects plants against unwanted insects and damaging leaf fungi. Made from natural latex that was originally developed to prevent evaporation, it creates a permeable, self-degradable barrier on the leaf, which still allows air and light to get through.

HOW TO USE IT?

There's no need to mix Leaf-Coat™ with water – simply apply straight from the bottle, preferably from an atomiser. Spray the leaves and flowers completely, and repeat this about two times a week until a fortnight before the end of the flowering period. Within a few hours of application, a very thin elastic layer – 1.5 microns thick – forms on the leaves. Its beneficial effects last for up to two weeks until it is naturally decomposed by light or sunlight.

WHY LEAF-COAT OFFERS BETTER PROTECTION IN ALL CONDITIONS

If the atmosphere gets too hot and humid (over 28°C), Leaf-Coat™ helps prevent the plant from losing too much water through evaporation. At the same time, the natural latex layer it forms around the leaves, helps the plant breath and stops it from 'sweating'. Then when the temperature drops, such as in winter months, Leaf-Coat™ safeguards against the cold by helping maintain the leaf temperature.

As an environmentally friendly alternative to pesticides, Leaf-Coat™ couldn't be more suitable or safer to use. Reducing the need to use pesticides also saves money. And unlike synthetic and toxic products it has a pleasant smell, and doesn't irritate. Because Leaf-Coat™ doesn't get absorbed by the leaves, it doesn't affect the taste of the fruit either.

ACTIVATOR

ACTI-VERA™

WHAT IS ACTI-VERA™?

Acti-Vera has been designed to protect the immune system, increase metabolism and enhance nutrient absorption in all sorts of plants. Healthy, fresh, anti-bacterial, cleansing, detoxing, beauty and skincare all come to mind when thinking of aloe vera. So we thought: if it does wonders on the skin, maybe its magic will work with plants too? After rigorous research trying out the best combination of ingredients to add to aloe vera extract, we settled on the final product: Acti-Vera™.

The most important difference between our other Biobizz products that are derived from the ground or sea and Acti-Vera™ is that this new product comes 'out of a plant, for a plant'. Or to put it another catchy way – 'plants for plants'!

HOW TO USE IT

Acti-Vera™ is very versatile. It can be used indoors and out on food crops, plantations, perennials and ornamental plants during the vegetative and flowering phase to stimulate growing and blooming. Biobizz recommend a dose of 5 ml of Acti-Vera per 1 litre of water.

WHY CHOOSE ACTI-VERA™?

Acti-Vera™ makes plants stronger and healthier, both inside and out. It protects and activates the immune system, increases germination and plant metabolism – breaking down sugars and enhancing nutrient absorption. It really is a super, natural power product for plants – and it's 100% vegan.
